CANDLE HOT OIL PARAFFIN PEDICURE

NEW!!!

Introducing the CANDLE HOT OIL PARAFFIN PEDICURE is designed to indulge and transform tired, worn-out feet into soft, rejuvenated ones.

Our Candle Hot Oil Paraffin Pedicure is an exclusive service that combines the nourishing benefits of candle hot oil and heated coconut hot oil therapy with the deep moisturizing properties of paraffin wax, providing an unparalleled pampering experience for your feet.

Let's begin with a soothing soak in a warm, aromatic Epsom salt and oil beads foot bath to soften and cleanse your skin as the first step, followed by clipping, filing, and shaping the toenails. Then, the sole care is callus removal and pumice stone scrubbing.

Some salons dip your feet in liquid paraffin wax a few times before wrapping them in plastic or a towel. For sanitation purposes, we have paraffin wax in the booties. Our skilled technicians will use a pair of warm paraffin wax booties on your feet, which envelop them, seal them in moisture, and deliver intense hydration.

As the paraffin wax works its magic, you'll enjoy a tranquil moment of relaxation, allowing the therapeutic heat to penetrate deeply, soothing tired muscles and joints. We will apply candle oil and heated coconut oil and massage them into your lower legs to enhance circulation and alleviate tension, then wrap your legs with hot towels.

While the moisturizing hot towels are wrapped, we massage your soles and feet. To finish, we apply a regular polish from our wide selection of premium lacquers.

** With our Candle Hot Oil Paraffin Pedicure, you're not just getting over an hour of indulgence but investing in the health and well-being of your tired feet.
